

DURATION

1 Day

WHO SHOULD ATTEND

This programme is designed for Managers, Supervisors and Operatives, who may need to enter a confined space with airline breathing apparatus to conduct a variety of work activities that include; maintenance and cleansing operations, building and refurbishment work, routine inspections, CCTV operations, flow monitoring and surveys.

AIM

To provide delegates with a thorough understanding of confined spaces, the associated legislation, approved code of practice (ACOP), dangers associated with confined spaces and the ability to enter, work and leave them safely, in addition to gaining an understanding of the safe use and planned maintenance of airline breathing equipment.

AFI is pleased to be able to provide an extensive range of certified training courses in collaboration with Speedy Training.

Delegates should provide a passport photograph on the day of training for production of ID cards.

Delegates attending this course should be physically and mentally fit to withstand the rigours of training.

The contents of this course includes awareness of periodic examinations of equipment. The course does not provide full training in maintenance of equipment.

For training held at your own location please ensure you make available a classroom suitable for the number of delegates attending, with a 240v power supply. Please ensure the practical area is free from harm, suitable for training and that it has been risk assessed.

COURSE CONTENT

- ◆ Confined Space Regulations 1997, Associated Legislation and ACOP
- ◆ Methods of Risk Control
- ◆ Atmospheric Monitoring
- ◆ Health Hazards and Control
- ◆ Safety Equipment and Pre-use Checks
- ◆ Airline Breathing Apparatus
- ◆ Practical Exercise and Assessment

KNOWLEDGE

By the end of the course, delegates will be able to:

- ◆ Summarise the requirements of the Confined Space Legislation and the associated ACOP
- ◆ Identify a confined space and its reasonable foreseeable risks
- ◆ Select appropriate methods of risk control
- ◆ Select appropriate safety equipment that may be used when entering a confined space and carry out appropriate pre-use checks

The methods used in this training course include a high proportion of hands-on demonstrations and practical exercises, supplemented with classroom based tutorials and pre and post course assessments.
