

Case Study

Put your trust in a long-standing Powered Access provider

When you purchase a new or used powered access machine from AFI Resale you are getting much more than just a machine – you also benefit from our complete range of support services.

Firstly, we will help you to select the correct machine for the work you are involved in. Then – if you need it – we can ensure that finance is in place to help with the purchase, through our own range of hire purchase, finance lease and operating lease schemes.

But what about the quality of the machine you are buying? You can be assured that your machine has been maintained to the highest standards by our highly-experienced team of engineers, culminating in a PDI to ensure that the machine is ready to get to work as soon as it rolls off our delivery vehicle.

AFI spray shop preparing machine for sale

Every machine you buy from us comes with a six month LOLER certificate, and for your ongoing peace of mind you also have the option to purchase one of our Service Maintenance Agreements.

As part of our commitment to health and safety within the working at height sector, we also offer a range of powered access machine secondary guarding systems, together with our award-winning SmartZone device which controls and monitors the use of a MEWP.

All of these services are possible because AFI Resale can call upon the resources, heritage, size and experience of our other operations within the AFI group of companies, such as AFI-Uplift and UTN Training.
